

OccasionPro — Complete Enterprise Event Operating System

Product Vision

OccasionPro is a modern AI-powered enterprise event operating system built for ALL kinds of events globally.

This is NOT just an event management application.

OccasionPro should function as:

- ERP for event companies
- CRM for sales & lead management
- Realtime operations command center
- Financial management platform
- Workforce coordination system
- Vendor ecosystem platform
- Luxury client collaboration system
- AI-powered business intelligence engine
- Event execution operating system

The platform must support:

- Weddings
- Destination weddings
- Corporate events
- Exhibitions
- Conferences
- Concerts
- Government events
- Political events
- Public events
- Religious events
- Sports events
- Educational events
- Festivals
- Hybrid events
- Virtual events
- Luxury private events

The architecture must scale from:

- Small event companies to

- Global enterprise event organizations.
-

FINAL PORTAL STRUCTURE

1. Super Admin Portal
2. Company Admin Portal (AI Command Center)
3. Event Manager Portal
4. Team Member Portal
5. Client Portal
6. Vendor Portal

Important: Do NOT create too many standalone portals.

All internal operational systems must stay inside:

Team Member Portal

1. SUPER ADMIN PORTAL

Purpose

Controls the complete SaaS ecosystem.

Used By:

- OccasionPro internal team
 - Platform administrators
 - SaaS operations team
-

Core Features

Platform Management

- Company management
- Subscription management
- SaaS plan controls
- Trial management

- White-label controls
 - Feature flags
 - Regional settings
 - Tenant controls
-

Revenue & Billing

- MRR tracking
 - ARR tracking
 - Revenue dashboards
 - Payment monitoring
 - Failed payment recovery
 - GST management
 - Invoice management
 - Subscription analytics
-

Platform Analytics

- Active companies
 - Active users
 - API usage
 - Storage usage
 - AI usage analytics
 - Realtime traffic monitoring
 - Growth analytics
-

Infrastructure Monitoring

- Server monitoring
 - Queue monitoring
 - API latency monitoring
 - Database health
 - CDN monitoring
 - Error monitoring
 - Backup monitoring
-

Security Command Center

- Audit logs
- Login monitoring
- Device management

- Session management
 - Threat detection
 - Access monitoring
 - Emergency access system
-

2. COMPANY ADMIN PORTAL (AI COMMAND CENTER)

Purpose

Main business operating system for event companies.

Used By:

- Company owners
- Directors
- Operations heads
- Finance heads
- Senior managers

This is the most powerful portal in the platform.

Executive Dashboard

Business Intelligence

- Revenue analytics
 - Profitability tracking
 - Lead conversion analytics
 - Team productivity analytics
 - Event profitability
 - Vendor performance tracking
 - Cash flow analytics
 - Outstanding payment tracking
-

AI Command Center

AI Business Intelligence

- AI profitability forecasting
- AI budget optimization
- AI risk prediction
- AI staffing recommendations
- AI vendor recommendations
- AI operational suggestions
- AI sales forecasting
- AI workflow optimization

AI Automation

- Auto reminders
 - Auto follow-ups
 - Auto task generation
 - Auto scheduling
 - Auto escalation workflows
 - AI-generated proposals
 - AI-generated event plans
-

Enterprise Workforce Management

Team Management

- Employee profiles
- Departments
- Role permissions
- Hierarchy management
- Attendance tracking
- Shift management
- Leave management
- Team productivity tracking

Advanced Workforce Features

- GPS attendance
 - Mobile attendance
 - Realtime field tracking
 - Task accountability tracking
 - Team performance scoring
-

Workflow Engine

Workflow Automation

- Custom workflows
 - Approval chains
 - SLA management
 - Automation triggers
 - Escalation systems
 - Conditional workflows
-

Enterprise Financial Management

Finance Features

- Budget management
 - Expense tracking
 - GST invoicing
 - Vendor payouts
 - Client billing
 - Multi-event accounting
 - Profit & loss reports
 - Financial approvals
 - Revenue forecasting
-

Communication Hub

Internal Communication

- Team chat
- Comments system
- Mentions
- Voice notes
- Shared notes
- Activity feeds

External Communication

- WhatsApp integration
- Email integration
- SMS notifications

- Push notifications
-

Asset & Inventory Intelligence

Asset Management

- Inventory tracking
 - QR/barcode system
 - Warehouse tracking
 - Asset allocation
 - Damage tracking
 - Maintenance schedules
-

Multi-Branch Enterprise Management

Branch System

- Multi-city support
 - Multi-country support
 - Branch analytics
 - Branch profitability
 - Centralized operations
-

3. EVENT MANAGER PORTAL

Purpose

Central operational command center for event execution.

Used By:

- Event managers
- Event coordinators
- Operations leads

This portal acts as:

The operational brain of every event.

Event Dashboard

Realtime Event Intelligence

- Event health score
- Timeline progress
- Budget tracking
- Task completion tracking
- Vendor readiness tracking
- Staff allocation monitoring
- Delay alerts
- Emergency alerts
- Live operations updates

Advanced Event Planning

Event Planning Tools

- Master event timeline
- Smart scheduling
- Event blueprint builder
- Seating planner
- Venue layout planning
- Resource allocation system
- Event dependency mapping
- Milestone planner

Event Templates

Template System

- Wedding templates
 - Corporate templates
 - Concert templates
 - Exhibition templates
 - Government event templates
 - Religious event templates
 - Sports event templates
-

Micromanagement System

Realtime Operations Control

- Live team tracking
 - GPS field tracking
 - Vendor live status
 - Setup progress monitoring
 - Transport coordination
 - Equipment movement tracking
 - Delivery tracking
 - Emergency escalation panel
-

Advanced Task Management

Task Engine

- Subtasks
 - Dependency chains
 - Approval checkpoints
 - Time tracking
 - Team accountability tracking
 - Delay alerts
 - Escalation workflows
 - Priority management
-

Vendor Operations

Vendor Command Center

- Vendor assignment
 - Vendor scheduling
 - Vendor SLA tracking
 - Vendor payment tracking
 - Vendor scoring system
 - Vendor compliance tracking
-

Guest Experience Management

Guest Intelligence

- VIP guest management
 - RSVP analytics
 - Seating intelligence
 - Guest categorization
 - Hospitality tracking
 - QR check-in analytics
-

Event-Day Command Center

Live Operations Center

- Realtime operations dashboard
 - Live team communication
 - Incident management
 - Security coordination
 - Live announcements
 - Realtime reporting
 - Emergency coordination
-

Crisis Management System

Emergency Features

- Incident logging
 - Backup vendor system
 - Emergency communication center
 - Crisis escalation workflows
 - Medical emergency coordination
 - Security escalation system
-

4. TEAM MEMBER PORTAL

Purpose

Unified workspace for all employees.

Used By:

- Sales teams
- Operations teams
- Accounts teams
- Designers
- Production teams
- Hospitality teams
- Marketing teams
- Field staff

This portal contains all operational modules.

CRM & SALES MODULE

Lead Management

- Lead capture
- Lead assignment
- Sales pipeline
- Follow-up tracking
- WhatsApp CRM
- Email CRM
- Call logs
- Meeting scheduler
- Lead scoring

Proposal System

- Proposal builder
 - AI proposal generator
 - Quotation management
 - Pricing templates
 - Approval workflows
-

FINANCE MODULE

Financial Operations

- Invoice generation
 - GST invoices
 - Expense tracking
 - Vendor payouts
 - Payment tracking
 - Budget approvals
 - Reimbursements
 - Profit tracking
-

OPERATIONS MODULE

Logistics Operations

- Resource planning
 - Vehicle scheduling
 - Route planning
 - Staff coordination
 - Material movement tracking
-

PRODUCTION MODULE

Technical Production

- Stage setup planning
 - AV coordination
 - Lighting planning
 - Sound coordination
 - Cue sheets
 - Rehearsal schedules
-

HOSPITALITY MODULE

Hospitality Operations

- Hotel allocations

- Airport transfers
 - VIP concierge
 - Guest hospitality tracking
 - Room management
-

ARTIST MANAGEMENT MODULE

Artist Operations

- Artist booking
 - Artist contracts
 - Rider management
 - Travel management
 - Stage scheduling
 - Backstage coordination
-

VENUE MANAGEMENT MODULE

Venue Operations

- Venue booking
 - Venue scheduling
 - Capacity management
 - Layout planning
 - Venue checklists
-

INVENTORY & WAREHOUSE MODULE

Asset Operations

- Inventory tracking
 - Warehouse management
 - QR/barcode scanning
 - Asset allocation
 - Damage reporting
 - Maintenance tracking
-

GUEST MANAGEMENT MODULE

Guest Operations

- RSVP management
 - Invitation system
 - QR ticketing
 - Check-in management
 - Seating management
 - VIP categorization
-

MARKETING MODULE

Marketing Operations

- Campaign management
 - Social media scheduling
 - Lead campaigns
 - Content management
 - Event promotions
 - Analytics dashboards
-

SUPPORT MODULE

Support Operations

- Ticket management
 - Client support
 - Internal support
 - Escalation workflows
 - Resolution tracking
-

MOBILE OPERATIONS MODULE

Field Operations

- Mobile checklists
- Live updates
- Photo uploads

- Attendance tracking
 - GPS tracking
 - Push notifications
 - Offline support
-

TEAM PRODUCTIVITY TOOLS

Collaboration Features

- Team chat
 - Shared notes
 - File sharing
 - Comments system
 - Team calendars
 - Internal announcements
 - Activity feeds
-

5. CLIENT PORTAL

Purpose

Premium collaboration experience for clients.

Used By:

- Wedding clients
 - Corporate clients
 - VIP customers
 - Enterprise customers
-

Client Dashboard

Event Visibility

- Event timeline
- Progress tracking
- Milestone visibility
- Event calendar
- Live updates

Approval Center

Client Approvals

- Proposal approvals
- Budget approvals
- Vendor approvals
- Design approvals
- Seating approvals

Financial Center

Client Financial Tools

- Invoice viewing
- Online payments
- Payment history
- GST invoices
- Budget visibility

Collaboration Tools

Client Experience Features

- Moodboards
- Inspiration galleries
- File uploads
- Shared notes
- Video meetings
- Chat system

Guest Management Access

Guest Features

- RSVP visibility
- Guest approvals
- Seating overview

- VIP guest handling
-

6. VENDOR PORTAL

Purpose

Vendor collaboration ecosystem.

Used By:

- Decorators
 - Caterers
 - AV teams
 - Production vendors
 - Photographers
 - Artists
 - Hospitality vendors
-

Vendor Dashboard

Vendor Operations

- Booking requests
 - Assigned events
 - Availability calendar
 - Setup schedules
 - Deliverable tracking
-

Vendor Financial Tools

Financial Features

- Quotations
 - Contracts
 - Invoice uploads
 - Payment tracking
 - Settlement reports
-

Vendor Communication

Collaboration Features

- Chat system
 - Requirement updates
 - Timeline coordination
 - File sharing
-

GLOBAL PLATFORM FEATURES

Realtime Collaboration System

Realtime Features

- Live updates
 - Realtime notifications
 - Activity streams
 - Team presence system
 - Realtime dashboards
-

AI ECOSYSTEM

AI Features

- AI scheduling
 - AI budgeting
 - AI proposal writing
 - AI analytics
 - AI communication drafts
 - AI forecasting
 - AI operational intelligence
-

ENTERPRISE SECURITY SYSTEM

Security Features

- RBAC permissions

- MFA authentication
 - Audit logs
 - Encryption
 - Device tracking
 - Threat monitoring
 - Activity tracking
-

ENTERPRISE INTEGRATIONS

Integrations

- WhatsApp API
 - Google Calendar
 - Outlook Calendar
 - Zoom
 - Razorpay
 - Stripe
 - Cloud storage systems
 - SMS gateways
 - Email systems
-

MOBILE-FIRST ECOSYSTEM

Mobile Features

- PWA support
 - Offline mode
 - Realtime sync
 - QR scanning
 - GPS tracking
 - Push notifications
-

PHASED DEVELOPMENT STRATEGY

PHASE 1 — MVP

Build first:

- Company Admin Portal

- Event Manager Portal
- Team Member Portal
- Client Portal

Core modules:

- Event management
 - CRM
 - Task management
 - Budgeting
 - Vendor management
 - File management
-

PHASE 2 — OPERATIONAL SAAS

Add:

- Realtime systems
 - Advanced finance
 - AI assistance
 - Team collaboration
 - Mobile operations
 - Automation workflows
-

PHASE 3 — ENTERPRISE PLATFORM

Add:

- Multi-country operations
 - Enterprise analytics
 - AI command center
 - Advanced security
 - Workforce intelligence
 - Vendor intelligence
-

PHASE 4 — GLOBAL AI EVENT OS

Add:

- Predictive AI systems
- Crisis command center

- Event simulation systems
 - Global operations intelligence
 - Marketplace ecosystem
 - AI operational automation
-

RECOMMENDED 0-COST TECH STACK

Frontend

- Next.js
 - TypeScript
 - TailwindCSS
 - shadcn/ui
 - Framer Motion
-

Backend

- Supabase
 - PostgreSQL
 - Supabase Auth
 - Supabase Realtime
 - Supabase Storage
-

Hosting

- Cloudflare Pages
 - Vercel
-

AI

- OpenRouter
 - Gemini API
 - Groq
-

Notifications

- Resend
 - Firebase Cloud Messaging
-

Monitoring

- Sentry
 - PostHog
-

FINAL PRODUCT GOAL

OccasionPro should feel like:

- A premium event operating system
- A realtime command center
- An AI-powered business brain
- An enterprise operational platform
- A luxury event ecosystem

The platform must be:

- Scalable
- Intelligent
- Realtime
- Modular
- AI-native
- Enterprise-grade
- Mobile-first
- Automation-driven
- Operationally powerful

The final experience should feel:

- Premium
- Fast
- Intelligent
- Futuristic
- Luxury-focused
- Enterprise-ready
- Globally scalable
